

Rizki Pangestu

Full Stack Developer, Data Scientist

Yogyakarta, Indonesia | Phone: 081279393094 | Email: riskypangestu057@gmail.com

SUMMARY

Full Stack Developer and Data Scientist with a strong foundation in Information Systems, currently pursuing a Bachelor's degree at Universitas Amikom Yogyakarta (GPA 3.84/4.00). Experienced in building end-to-end web systems and data-driven solutions across multiple real-world projects.

On the Full Stack side, has developed and deployed production-ready systems including a construction management system, laboratory information system, a SaaS-based laundry management platform with AI-powered recommendations and QRIS payment integration, and a trading journal application (Pivora) with AI-driven psychological analysis and market sentiment notifications.

On the Data Science side, has hands-on experience in machine learning, computer vision, and predictive analytics including an ensemble ML model for insurance claim trend prediction (Prophet, LightGBM, XGBoost, Ridge, ElasticNet, ETS with SLSQP optimization), a hybrid job recommendation system using AHP-Weighted SBERT and TF-IDF with Euclidean Distance, a health-tech capstone project (Jivara) focused on food detection and medication adherence tracking, and an Indonesia mortality case dataset analysis. Proficient in Python, PHP (Laravel, CodeIgniter), Next.js, MySQL, Tableau, and Google Looker Studio. Bilingual in Indonesian and English.

EXPERIENCE

Coding Camp 2026 powered by DBS Foundation - Dicoding Data Scientist Participant (February – May 2026)

- Completed an intensive Data Scientist learning path covering Python programming, machine learning, data analysis, data processing, and data visualization
- Developed soft skills including personal productivity, project management, growth mindset, and professional English communication
- Passed all 3 Mandatory Achievement Cut-Off checkpoints throughout the program
- Built capstone project Jivara Stay on Track, Stay Healthy: health-tech application for food detection and medication adherence tracking using computer vision and AI
- Responsible for data collection, transformation, and dataset preparation for ML model; developed Streamlit dashboard for food-drug interaction monitoring and defined business problem framing for the team

CV.GASNI ADITAMA KONSTRUKSI – Jogja, Full Stack Developer (June 2025 – Maret 2026)

- Developed and enhanced features for an in-house construction management system to support daily business operations
- Maintained and monitored system performance, ensuring stability and reliability across modules
- Performed data entry and managed structured data input to keep the system's database accurate and up to date
- Collaborated with internal stakeholders to identify operational pain points and translate them into technical solutions
- Built and integrated new modules using PHP (CI3), MySQL, and REST API based on evolving business needs

CV.GASNI ADITAMA KONSTRUKSI – Jogja, Indonesia Social Media Marketing (July 2024 - Mai 2025)

- Develop and manage social media content strategies aligned with construction industry standards
- Create engaging visual content and graphics for company's social media platforms
- Monitor and analyze social media metrics to optimize campaign performance
- Increased social media engagement by 45% through strategic content optimization and creative visual storytelling
- Successfully launched 5 major brand campaigns resulting in 30% increase in brand awareness
- Developed unique visual identity system that improved brand recognition by 25%

AMCC (Amikom Computer Club), Universitas Amikom Yogyakarta Member – Data Science Division (2023 - sekarang)

- Actively contributed to data science discussions, knowledge sharing, and internal workshops within the university's computer club
- Collaborated with fellow members on data-related projects and technical problem-solving sessions
- Completed a final project assigned by AMCC facilitators as part of the division's structured learning program

KBMDG STUDIO – Padang, Indonesia Junior Graphic Designer (January - May 2022)

- Led the development of various design projects by collaborating with creative team members
- Created visual content for multiple platforms maintaining brand consistency and design standards
- Utilized Adobe Creative Suite (Illustrator, Photoshop, After Effects) to produce high-quality designs
- Conceptualized and delivered 20+ distinct design projects with 100% client satisfaction rate
- Pioneered new design approach that reduced revision cycles by 40

Tanpa Sengaja Coffe – Payakumbuh Waiter and Bartender (October 2022 - February 2023)

- Provided excellent customer service while managing food and beverage operations
- Handled multiple customer orders efficiently during peak hours
- Maintained a clean and organized work environment while ensuring customer satisfaction

VOLUNTEER EXPERIENCE

International Business Solution Expo (IBSE) – Main Gate (April 22-24, 2023)

- Coordinated event logistics and managed visitor access
- Ensured smooth operation of event entrance and registration
- International Business Pitching Competition (CYE JCI) (April 30, 2023)
- Served as Liaison Officer for Judge Thomas Lim (General Manager LawBank Malaysia)
- Facilitated communication and scheduling during the competition

Hipmi Pt Amikom Committee – Chairman of the committee (June 6, 2023)

- Led as Committee Chairman for the inauguration event
- Managed team coordination and event execution

Crypto Enthusiast Speaker – Talk Show FORBISDA HIPMI DIY Blockchain 101: Belajar dari Dasar, Bangun Bareng Meta Pool Jogja Expo Center (February 6, 2026)

- Delivered presentations on blockchain fundamentals and cryptocurrency ecosystems
- Shared insights on Web3 trends, crypto adoption, and digital assets
- Educated participants about opportunities and risks in the blockchain industry
- Engaged with crypto enthusiasts and community members during discussions and Q&A sessions
- Contributed to blockchain community education and awareness initiatives

ORGANIZATIONAL EXPERIENCE

HIPMI PT Amikom Yogyakarta Ketua Divisi OKK (*Organisasi, Kaderisasi & Keanggotaan*) (May 2024)

- Led the membership recruitment, onboarding, and cadre development division
- Managed organizational programs to strengthen member engagement and institutional capacity

Anggota Divisi Kerjasama Antar Lembaga (February 2026)

- Contributed to building partnerships and institutional collaborations between HIPMI PT Amikom and external organizations
- Supported coordination and communication with partner institutions

JJC Amikom Jogja – Board of Director Business Pillar Division (Feb 2026)

- Contributed to business development strategies and community growth initiatives within JJC Amikom
- Supported cross-division collaboration to drive the organization's business-oriented programs

EDUCATION

UNIVERSITAS AMIKOM YOGYAKARTA (2023 - 2027)

Bachelor of Information System - IPK 3.84/ 4.00

SMK N 3 PAYAKUMBUH (2020 - 2023)

Multimedia

SKILLS

Full Stack Development

- PHP (Laravel, CodeIgniter), Next.js, React, HTML/CSS
- MySQL — database design, query optimization
- REST API development & integration
- Git version control

Data Science & Analytics

- Python (Pandas, NumPy) untuk analisis dan pengolahan data
- Machine Learning — supervised & unsupervised learning, model evaluation
- Sistem Rekomendasi — collaborative filtering, content-based filtering, hybrid filtering dan deployment
- Google Looker Studio — pembuatan dashboard & laporan interaktif
- Tableau — visualisasi data dan business intelligence
- MySQL — query data untuk kebutuhan analitik

Design & Creative

- Adobe Illustrator, Photoshop, Premiere Pro, After Effects
- Social media content strategy & analytics
- Copywriting & campaign planning

Soft Skills

- Strong communication (bilingual: Indonesian (active) & English (Passive))
- Team leadership & collaboration
- Creative thinking & problem solving
- Bisnis Development
- Project Management
- Data-driven Decision Making

PROJECTS

Data Science Projects

1. Insurance Claim Trend Prediction Ensemble ML Model (*Competition Project*) Python · Prophet · LightGBM · XGBoost · Ridge · ElasticNet · ETS · SLSQP

- Built an ensemble machine learning model combining 6 algorithms (Prophet, LightGBM, XGBoost, Ridge Regression, ElasticNet, Holt-Winters ETS) with weight optimization using SLSQP
- Predicted frequency, severity, and total nominal of individual health insurance claims for January–December 2026
- Delivered strategic recommendations for insurers to maintain premium affordability amid a 25.5% claim increase
- Applied feature engineering to improve model accuracy compared to baseline without feature engineering

2. Hybrid Job Recommendation System (*Research Project*) Python · SBERT · TF-IDF · AHP · Euclidean Distance

- Developed a personalized job recommendation system for the Indonesian market using a hybrid approach combining AHP-Weighted SBERT and TF-IDF with Euclidean Distance similarity
- Full title: *"Hybrid Job Recommendation System Using AHP-Weighted SBERT and TF-IDF with Euclidean Distance for Personalized Job Matching in Indonesia"*
- Addressed cold-start and relevance issues common in existing job platforms

3. Jivara Stay on Track, Stay Healthy (*DBS Foundation Capstone*) Python · Computer Vision · Streamlit · Machine Learning

- Contributed as Data Scientist in a cross-functional team for a health-tech application detecting food items and tracking medication adherence
- Collected and transformed datasets for computer vision model training
- Built Streamlit dashboard to visualize food-drug interaction insights and user compliance tracking
- Defined business problem framing and project background

4. Indonesia Mortality Case Dataset (*Data Research Project*) Python · Pandas · Data Visualization

- Collected and processed mortality case data in Indonesia across multiple cause categories including natural disasters, infectious diseases, and other contributing factors
- Structured dataset for analytical and predictive use cases related to public health trends

Full Stack Projects

1. Construction Management System CV Gasni Aditama Konstruksi PHP · CI 3 · MySQL · REST API

- Developed a comprehensive construction management system solving multiple business operational challenges including project tracking, resource management, and reporting
- Deployed to production and actively used by the company

2. Laboratory Information System PHP · CI3 · MySQL

- Built an information system to streamline administrative processes between admin staff, laboratory officers, and patients
- Enabled patients to access lab results digitally, reducing miscommunication and operational errors in daily lab workflows

3. SaaS Laundry Management System PHP · CI3 · MySQL · QRIS · AI Integration

- Developed a multi-tenant SaaS platform for laundry business and client management
- Features include financial recording, automated QRIS payment integration, inventory tracking, and AI-powered business recommendations
- Designed to simplify day-to-day laundry operations for small business owners

4. Pivora Trading Journal Application PHP · Laravel · Next.js · MySQL · AI Integration

- Built a trading journal app to monitor trading activity and user psychology patterns
- Integrated AI-driven insights based on previously inputted journal data as training input
- Delivered Fear & Greed Index notifications and personalized trading recommendations to support better decision-making
